PROFESSIONAL SUMMARY

Psychology undergraduate (B.A. Honours with Research, expected 2029) at Banasthali Vidyapith with minors in Computer Applications and Management. Skilled in prompt engineering, AI-assisted content creation, and behavioral research. Passionate about the intersection of artificial intelligence and human behavior, with a focus on AI-powered mental health solutions, human-computer interaction, and technology-driven innovation.

EDUCATION

B.A. (Honours) with Research in Psychology

Banasthali Vidyapith | Expected Graduation: 2029

- Minors: Computer Applications, Management
- Relevant Coursework: Cognitive Psychology, Research Methodology, Human Behavior, Computer Applications, Organizational Management

PROJECTS

AI Learning Portfolio | Ongoing

- Participating in a structured 60-Day AI Learning Challenge, completing daily AI implementation exercises focused on prompt engineering and workflow optimization.
- Documenting progress, projects, and technical learnings through GitHub repositories and LinkedIn, building a public portfolio of applied AI skills.

Psychology Content Creation | Ongoing

- Create digital content simplifying psychological concepts for broader public audiences, increasing awareness of mental health and human behavior.
- Explore digital platform strategies to maximize educational reach and audience engagement.

SKILLS

AI & Technology: Prompt Engineering, Claude AI, ChatGPT, Generative AI Tools, Git & GitHub, AI-Assisted Content Creation

Research & Analysis: Behavioral Research, Literature Review, Data Collection, Scientific Writing, Critical Thinking

Professional: Communication, Problem Solving, Project Documentation, Analytical Thinking, Collaboration, Time Management

CERTIFICATIONS & CONTINUOUS LEARNING

60-Day AI Challenge (Ongoing)

- Daily AI implementation exercises covering artificial intelligence fundamentals, prompt engineering, and human-computer interaction.
- Documenting progress via GitHub project repositories and LinkedIn learning updates.

Areas of Active Study:

Artificial Intelligence Fundamentals • Prompt Engineering • Human-Computer Interaction • Psychology and Technology Applications
